Benchmark	60% FTSE All Share + 40% FTSE World ex UK hedged to GBP
Investment Style	Active
Sedol code	B29JCG1
Performance Objective	to return RPI +5% per annum over a five to seven year period.

## Commentary

Most asset classes again delivered a positive absolute return over the quarter. After maintaining a bias towards Asian and emerging markets, which performed excellently throughout 2009, we have started to reduce this during the first quarter. Stocks in the consumer services, healthcare and industrials sector also posted good returns. The Funds performance was driven by good stock selection, particularly within Resources, Telecoms and Financials. However, the slightly defensive sector positioning, particularly being overweight the lagging Telecoms sector, tempered performance somewhat, particularly towards the end of the quarter when cyclical was far more highly prized by investors.

The index benefited from substantial gains in financials – a sector where the fund is structurally underweight. However, the manager believes the portfolio remains well positioned for the current macro environment and in keeping with its capital preservation focus. Commodities were down over the quarter although our holdings in gold and energy held up well both delivering positive returns with the SISF Energy fund ahead of its energy equity benchmark.

Past performance of the fund to 31 March 2010

	Quarter	1 Year*	3 Years*	5 Years*
Schroders Life Intermediated Diversified	6.0	38.5	N/A	N/A
Benchmark	2.4	9.4	N/A	N/A

Source: Prudential and Financial Express. \*annualised

Based on percentage change in unit price. It is important to remember that past performance is not a reliable indicator of future performance. The value of your investment may go down as well as up and the fund value at retirement may be less than the payments you have made.

## Prudential risk rating

### Medium to Higher

#### What type of funds are in this risk category?

These funds offer a diverse geographical spread of equity investment. The funds within this category will have greater overseas exposure and underlying volatility than the "medium" sector.

## What is the risk rating?

- Risk ratings have been developed by Prudential to help provide an indication of the potential level of risk and reward that is attributable to a fund based on the type of assets which may be held within the fund. Other companies may use different descriptions and as such these risk ratings should not be considered as generic across the fund management industry.
- Prudential will keep the risk ratings under regular review and as such they may be subject to change in the future. We therefore recommend that before making any fund choice in the future you understand the appropriate risk rating before making a decision. You will find this information at [www.pru.co.uk/factsheets](http://www.pru.co.uk/factsheets).
- You should also consider discussing your decision and the appropriateness of this risk rating with an adviser

## Important information

### Who is this factsheet for and what does it do?

This factsheet is intended for the trustees, sponsors, advisers and members of occupational pension schemes using Prudential's Fund Delivery Service.

Its purpose is to shed some light on how investment markets and funds have performed over the period and is provided for information only.

If you are not familiar with any of the investment terminology included on this factsheet, then please contact an adviser.

### Can I get advice?

This factsheet should not be considered as a financial promotion and any changes to investment arrangements should be discussed with an adviser. It is not our intention to give an indication of how any particular funds will perform in the future. The commentary in this factsheet reflects the general views of the individual fund manager and should not be taken as a recommendation or advice as to how a specific market or fund is likely to perform.

### Who manages the funds?

This fund is managed by Schroders

### How are the performance figures calculated?

The performance shown overleaf is measured on the fluctuation of the daily published price. This published price is adjusted to accommodate the fund's dealing cycle where appropriate.

To obtain current unit price and performance information for all funds in the Prudential Fund range, simply log on to <http://www.pru.co.uk/funds/series/> and choose 'Pension Funds' and then select Prudential Corporate Pensions (Series 4).

### How are the fund prices calculated?

This fund has a single price, based on the valuation of the underlying assets and cash flows into and out of the fund. This valuation price will be the published price.

### What is the dealing cycle?

The Pensions Series 4 fund range is forward priced which means that the member gets the next available price after they invest.

This fund has a dealing cycle of T+1. This means that money received on day T buys units at the valuation date price applicable at close of business 1 day later.

### Other important information

Exchange Rate fluctuations may cause the Sterling values of overseas investments to rise or fall.
