› Investment choice

A key benefit of Prudential Pension Plans is that we offer you the choice of investing in a wide range of funds from a number of fund managers. This guide will help you and your Financial Adviser decide which pension funds you want to invest in. Your choice will depend upon your attitude to risk and your personal investment needs.

Choice of funds

At Prudential we offer a range of funds aimed at meeting the differing needs of each investor. These can either be funds that invest in just one type of asset (for example company shares or fixed interest securities) or funds that invest in a range of assets.

This second type of fund is often referred to as a managed fund. Prudential provide a range of this type of fund, which hold a large number, and varying types, of assets. These managed funds are complemented by a selection of funds that target one specific asset or country to give you choice.

The value of an investment may go down as well as up and your fund value in future may be less than the payments you have made. For the funds which can invest in overseas stocks or shares, not all the assets will be denominated in sterling and the value of each of the funds could therefore be affected by prevailing exchange rates. Changes in the rate of exchange between currencies may cause your investment to go down or up.

Choice of risk profile

Before deciding which funds to invest in, you should consider the types of funds and level of risk involved. To help you choose an investment mix to suit your specific needs, the funds are graded into risk bands – minimal risk, lower risk, lower to medium risk, medium risk, medium to higher risk and higher risk.

Prudential will keep the risk rating categories under regular review and as such they may be subject to change in the future. Where a risk rating is amended as a result of, in our view, a significant change to the assets held by the fund, or in the way the fund is managed, information will be provided on the new risk rating. We recommend that before making any fund choice in the future you ensure you understand the appropriate risk ratings at that time. You will find this information in our fund guides, along with further information at www.pru.co.uk/funds.

You should also consider discussing your decision with your financial adviser. It is important to also note that your adviser may make their own assessment of the risk rating of funds when considering your needs and objectives, and this may differ from Prudential's own internal assessment. They may charge you for advice.

The information included in this guide is correct as at November 2011.

Furthermore, for pension investment, it is important to take into account the perceived fund risks that suit each individual life stage. Different risk profiles may be appropriate at different stages of the investment.

Please remember that the name of the fund is not indicative of the risk that it may take.

You should also consider the effect of inflation. Please bear in mind that inflation could also reduce the value of your Plan and any growth from it.

➤ Prudential pension funds

The tables detail pension funds available via our Premier Pension range, Flexible Retirement Portfolio and all unitised pension plans originally taken out with Scottish Amicable. Please note this guide covers the pension funds, which may not be available to your particular plan. Please check your policy conditions.

If you are invested in a fund which is not included in this guide, please refer to www.pru.co.uk/funds for more information.

Funds available for investment in:

- Prudential Premier Plans
- Flexible Retirement Portfolio
- Ex-Scottish Amicable Plans

Prudential Cash Pension Fund	Prudential Japanese Pension Fund	Prudential Property Fund

* Only available for all Individual & Group Series A & Premier Personal Pension Plans. Not available for Stakeholder pension (Individual or Group). Flexible Portfolio Plan, Trustee Investment Plan (where original investment was made on or after 1 January 2003) or Occupational Plans.

** This fund is only open to existing investors.

› Risk types

To help you and your adviser assess the potential level of risk and reward of our funds, we've included in this guide information on the risks applicable with different types of assets.

We have categorised these risks in line with the major asset types and investment styles used (see Risk Types on the following pages). To help you choose an investment mix to suit your specific needs, the funds are graded into risk bands – minimal risk, lower risk, lower to medium risk, medium risk, medium to higher risk and higher risk. For those risks that are not classified under these headings, they are referred to as "Other".

To try and reduce the risk of losing money many funds hold a broad range of different types of assets. This means that you are not relying on the performance of an individual asset, nor of assets of the same type. This practice is known as diversification.

Equity

Equities are commonly known as "shares". When a fund buys a company share, it is investing in a company and, in exchange, receives a share of the ownership of that company. Shares give two potential investment benefits:

- › share prices increase as the value of the company increases
- › companies pay dividends – regular payments made to shareholders based on how well the company is doing.

Over the longer-term, equities are considered by many investment experts to offer greater growth potential than many other asset types. But over the short term, the value of equities can go up and down a lot. Funds investing in equities tend to carry a higher risk of capital loss than funds investing in fixed interest securities or money market investments (see below). The financial results of other companies and general stock market and economic conditions can all affect a company's share price, and consequently the value of any fund investing in that company.

Where a fund invests significantly in equities, we have rated the fund as having a risk type of "Equity".

Fixed Interest and Index-Linked Securities

Fixed interest securities, more commonly known as "bonds", are loans issued by companies or by governments in order to raise money. Bonds issued by companies are called Corporate Bonds, those issued by the UK government are often called Gilts or UK Government Bonds and those issued by the US government are called Treasury Bonds. In effect all bonds are IOUs that promise to pay you a sum on a specified date and pay a fixed rate of interest along the way.

Index-linked securities are similar but the payments out are normally increased by a price index e.g. for UK government index-linked securities, payments out are increased in line with the UK Retail Price Index.

On the whole, investing in bonds is seen as lower-risk than investing in equities. Gilts are very low-risk. To date, no UK government has ever failed to pay back money owed to investors. But with corporate bonds there is a risk that the company may not be able to repay its loan or that it may default on its interest payments.

The risks related to investing in bonds can be reduced if you invest through a bond fund. Where a fund manager selects a range of bonds, you are less reliant on the performance of any one company or government. If bond income generated is reinvested by the fund, bond funds can be used to provide attractive levels of growth. However, there is a risk you might not get back the amount you invest and the income you receive is neither fixed or guaranteed.

Corporate and Government bonds are sensitive to interest rate trends. An increase in interest rates is likely to reduce their value, and hence the value of any fund investing in them.

Where a fund is exposed to this risk, we have rated the fund as having a risk type of "Fixed Interest".

Commercial Property

Commercial property investment generally means the fund is sharing in the returns from the ownership of some buildings (for example, offices and shopping centres). The value of the property may increase and tenants may pay rent to the owners of the building.

However, commercial properties can be difficult to buy and sell quickly. Fund managers may have to delay withdrawal of money by customers from a property fund until they can sell some of the buildings the fund invests in.

The actual value of a property is what someone is prepared to pay for it – an actual sale value. As sales are infrequent, interim valuations are based on a valuer's opinion and may be revised up or down from time to time. This can affect the value of a fund invested in commercial property, with the value possibly fluctuating significantly.

This leads to a number of risks for funds investing in property:

- Cash could remain uninvested as property assets can be difficult to buy, leading to lower returns than expected.
- The value of the fund may be reduced if a large number of withdrawals are requested and it is necessary for properties to be sold at reduced prices.
- There may be delays removing your money from the fund if property cannot be sold.
- Property fund valuations may be revised periodically, upwards or downwards.
- Rental income is not guaranteed. Defaulted rent and unoccupied properties could reduce returns.
- If the size of the fund falls significantly, the fund may have to hold fewer properties, and this reduced diversification may lead to an increase in risk.

Where a fund is exposed to these risks, we have rated the fund as having a risk type of "Property".

› Risk types – continued

Currency Risk and Overseas Investments

Overseas investments allow you to take advantage of the growth potential of markets outside of the UK, but currency changes can affect the value of overseas investments. Because the value of overseas investments is converted from local currency into pounds (Sterling), the Sterling value can fall if the local currency weakens against Sterling, independent of the performance of the asset itself.

Where a significant proportion of a fund is invested in non-Sterling assets, we have rated the fund as having a risk type of "Currency".

Smaller Companies and Developing Markets

In comparison to larger companies, shares of smaller companies may be harder to trade and short-term performance may be more volatile. There may also be more chance the companies will become insolvent. Funds which invest in small companies can have volatile returns and a greater risk of capital loss.

Some investments are in markets which are less developed than the UK market. In such markets, the ability to trade, and the safe keeping of assets on behalf of the fund, and especially regulation may all be poorer than in well-developed markets. This means increased risk for your investment.

Where a fund has these types of risk, we have rated it as having a risk type of "Smaller Companies and Developing Markets".

Financial Instruments

There are several financial arrangements that fund managers can use to improve fund performance. Some of the most common are:

Derivatives: These cover products such as futures and options which are generally an arrangement to buy or sell a standard quantity of a specified asset on a fixed future date at a price agreed today. This type of investment may carry a higher risk of capital loss than funds investing in other assets. Sometimes in the event of a counterparty to a derivative (the party with which the fund manager has made the agreement about future deals) being in financial difficulties, it may be difficult to obtain a price for valuations or for the investment manager to dispose of the asset – that creates risk to the value of the fund. There is a risk of capital loss in the event of the counterparty to the derivative becoming insolvent or suffering other financial difficulties. In such circumstances the derivative may have no value.

Geared Assets: Funds that are geared or borrow assets or which use short-selling are likely to be more volatile than other funds and there is a higher risk of capital loss.

Where a fund could be exposed to these types of risk, we have rated it as having a risk type of "Financial Instruments".

Other

We have rated a number of funds as having a risk type of "Other".

- › In addition to the risks and characteristics of the individual asset types, specialist investments have other features that are unique to where they invest.

Specialist funds invest in particular markets or geographical areas. Because they invest in a smaller range of asset types, they tend to be more risky than non-specialist funds, but can deliver greater returns.

- › Ethical funds are restricted from investment in certain companies due to the criteria used to select investments for the fund. This may mean that the returns from the fund are more volatile than funds which do not have these restrictions.

- › The fund may have investment concentrated in relatively few individual assets. Therefore, returns from the fund can be significantly influenced by the performance of a small number of individual holdings and may be more volatile than funds with a wider spread of underlying assets.
- › Some funds keep a proportion of your money in cash deposits and other money market investments. Over the long-term, money market investments usually offer the lowest risk of all asset types but also the lowest potential returns. Some funds hold money market investments because they are aiming for security more than substantial growth. Others hold just enough in cash deposits to make sure money is available for customer withdrawals. Over the long term, money market investments can be a low risk asset type but may also produce low returns compared to other asset types.

A money market investment is at risk if any of the banks, building societies or other financial institutions with whom the fund's money is deposited becomes insolvent or suffers other financial difficulties. In such circumstances, the money deposited with that institution may not be returned in full. Some money market investments will be affected if interest rates rise, leading to a drop in value of any fund holding them.

- › The fund may offer some form of protection from downside risks for which there will be a charge and which will normally have an impact on long-term returns. The protection may be provided through the use of derivative contracts and this may give rise to counterparty risk and liquidity problems. The provision of the guarantees may result in a significant proportion of the fund being invested in cash and other lower risk investments.

Where a fund could be exposed to these types of risk, we have rated it as having a risk type of "Other".

➤ Important information

Full terms and conditions of our Pension Plans are available on request.

Further information on these funds is available in the Fund Prices section of our website www.pru.co.uk/funds

From time to time, investment-linked funds may hold a small proportion of cash in addition to stocks, shares or property.

It should be appreciated that unit prices of the investment-linked funds can go down as well as up. The value of an investment or fund may fluctuate and is therefore not guaranteed. You may not get back the full amount of your original investment. For investments in the With-Profits Fund the value of the policy depends on how much profit the fund makes and how we decide to distribute that profit. Policyholders receive a distribution of profits by means of bonuses or other methods as specified in the relevant policy documentation.

If the taxation treatment of the funds changes, we reserve the right to change the arrangements for the investment of the underlying assets of the fund.

Our charges may vary in the future and may be higher than they are now.

For any fund there may be a delay in buying, selling or switching of units. These delays will only apply in exceptional circumstances and if this applies to you we will let you know.

When determining the basis to be used for calculating the unit price, it is important to consider how much money is either going into the fund or is being taken out. The unit price is then used to determine the value of individual policyholders' investments in the fund.

If more money is being paid into the fund than is being taken out, then the fund will need to purchase assets. If this is the case then the amount that is needed to buy assets for the fund (i.e. the purchase price) will be more relevant than the amount obtained for selling the assets (i.e. the sale price) in determining the unit price of the fund.

If more money is being taken out of the fund than is being paid in then the fund will need to sell assets. If this is the case, the sale price of the underlying assets will be more relevant when calculating the unit price.

Sales prices are generally lower than purchase prices. The size of the difference depends on the cost of either purchasing or selling the assets the fund invests in. These costs tend to be largest for funds investing in property, smaller companies and developing markets so will have the largest impact on the change in price. If there is a switch from a purchase price to a sales price then the unit price will reduce. If there is a switch from a sales price to a purchase price then the unit price will increase. In both cases the movement in price can be significant and will occur immediately.

Please see your policy conditions for further information.

› Fund descriptions, fund charges and risk classification

Fund charges and classification (charges may vary in future)

Category/Fund	Annual Management Charge % Series A funds applicable to: – Prudential Premier Plans – Ex-Scottish Amicable Series A & Premier Plans	Annual Management Charge % Non series A funds applicable to: – Ex-Scottish Amicable plans except Series A and Premier Plans – Flexible Retirement Portfolio
Minimal risk – This fund may invest in a combination of deposits, money market investments and other types of interest bearing securities.		
Prudential Cash Pension Fund*	1.00	0.875
The investment strategy of the fund is to provide a return consistent with investing in interest bearing deposits and/or short-term UK government bonds.		

* This Fund has a guarantee that the bid value of units in the Fund will not fall.

➤ Fund descriptions, fund charges and risk classification – continued

Category/Fund	Annual Management Charge % Series A funds applicable to: – Prudential Premier Plans – Ex-Scottish Amicable Series A & Premier Plans	Annual Management Charge % Non series A funds applicable to: – Ex-Scottish Amicable plans except Series A and Premier Plans – Flexible Retirement Portfolio
Lower risk – These funds may invest in fixed interest securities including gilts, index-linked and an element of corporate bonds. These types of investment are generally recognised as lower risk		
Prudential 95% Safeguard Pension Fund*	1.00	0.875
The investment strategy of the fund is to provide capital protection with a degree of exposure to movements in the FTSE 100 Capital Index by investing mainly in cash and derivative instruments. Any reduction in the price of units is limited to 50% of any fall in the FTSE 100 capital index subject to an overall maximum reduction of 5% in each quarter.		
Prudential Fixed Interest Pension Fund	1.00	0.875
The investment strategy of the fund is to purchase units in the M&G Gilt & Fixed Interest Income Fund. That fund aims to provide a secure income with stability of capital consistent with investment in gilts. The fund invests mainly in short, medium or long dated gilts according to M&G's view at any given moment of the likely course of interest rates and trend of the gilt-edged market.		
Prudential M&G Gilt and Fixed Interest Income Pension Fund**	1.25	1.125***
The investment strategy of the fund is to purchase units in the M&G Gilt & Fixed Interest Income Fund. That fund aims to provide a secure income with stability of capital consistent with investment in gilts. The fund invests mainly in short, medium or long dated gilts according to M&G's view at any given moment of the likely course of interest rates and trend of the gilt-edged market.		

* The Safeguard Pension Fund is designed to offer 95% protection with a degree of exposure to rises in the FTSE 100 Capital Index. It could be ideally suited to lump sum investors who want to protect their accumulated pension fund whilst benefiting (at least partly) from equity growth. However, it could be equally appropriate for investors making regular contributions who have built up a large fund and may wish to lower the risk of their portfolio. The performance of the Safeguard Fund is not guaranteed by Prudential and depends on the returns of underlying deposits with selected institutions.

** This fund invests directly in to the fund managers' own underlying fund or collective investment scheme.

*** This non-series A fund is available to the Flexible Retirement Portfolio only.

Category/Fund	Annual Management Charge % Series A funds applicable to: – Prudential Premier Plans – Ex-Scottish Amicable Series A & Premier Plans	Annual Management Charge % Non series A funds applicable to: – Ex-Scottish Amicable plans except Series A and Premier Plans – Flexible Retirement Portfolio
Lower to medium risk – Some of these funds invest in fixed interest securities, predominantly corporate bonds, with higher yielding corporate bonds placed towards the top end of this range as they carry higher default risk. The other funds in this category invest in a wide range of assets which help to provide risk diversification.		
Prudential UK Equity and Bond Pension Fund	1.00	0.875**
The investment strategy of the fund is to provide income and long-term capital growth, by investing mainly in UK equities, corporate bonds and to a lesser extent UK government bonds (gilts).		
Prudential Corporate Bond Pension Fund	1.00	0.875**
The investment strategy of the fund is to purchase units in the M&G Corporate Bond Fund. That fund aims to achieve a higher total return (the combination of income and growth of capital) from investment than would be obtainable in UK government fixed interest securities (ie gilts) of similar maturities. The fund invests mainly in sterling denominated corporate debt instruments. Any currency exposures within the fund may be managed by currency hedges into sterling.		
Prudential Invesco Perpetual Corporate Bond Pension Fund*	1.65***	n/a
The investment strategy of the fund is to purchase units in the Invesco Perpetual Corporate Bond Fund. That fund aims to achieve a high level of overall return, with relative security of capital, through investing primarily in fixed interest securities.		
Prudential M&G Corporate Bond Pension Fund*	1.15	1.025**
The investment strategy of the fund is to purchase units in the M&G Corporate Bond Fund. That fund aims to achieve a higher total return (the combination of income and growth of capital) from investment than would be obtainable in UK government fixed interest securities (ie gilts) of similar maturities. The fund invests mainly in sterling denominated corporate debt instruments. Any currency exposures within the fund may be managed by currency hedges into sterling.		

* These funds invest directly into the fund managers' own underlying fund or collective investment scheme.

** These non-series A funds are available to the Flexible Retirement Portfolio only.

*** Only available for all Individual & Group Series A & Premier Personal Pension Plans. Not available for Stakeholder pension (Individual or Group). Flexible Portfolio Plan, Trustee Investment Plan (where original investment was made on or after 1 January 2003) or Occupational Plans.

› Fund descriptions, fund charges and risk classification – continued

Category/Fund	Annual Management Charge % Series A funds applicable to: – Prudential Premier Plans – Ex-Scottish Amicable Series A & Premier Plans	Annual Management Charge % Non series A funds applicable to: – Ex-Scottish Amicable plans except Series A and Premier Plans – Flexible Retirement Portfolio
Lower to medium risk – Some of these funds invest in fixed interest securities, predominantly corporate bonds, with higher yielding corporate bonds placed towards the top end of this range as they carry higher default risk. The other funds in this category invest in a wide range of assets which help to provide risk diversification.		
Prudential M&G High Yield Corporate Bond Pension Fund*	1.25	1.125**
<p>The investment strategy of the fund is to purchase units in the M&G High Yield Corporate Bond Fund. That fund aims to maximise total return (the combination of income and growth of capital) while generating a high level of income. The fund invests predominantly in higher yielding corporate debt instruments which may be denominated in sterling, European currencies and other major global currencies, should the investment managers deem them to be appropriate investments.</p>		
Prudential M&G Strategic Corporate Bond Pension Fund*	1.40***	n/a
<p>The investment strategy of the fund is to purchase units in the M&G Strategic Corporate Bond Fund. That fund aims to maximise total return (the combination of income and growth of capital) through investment predominantly in investment grade corporate bonds.</p>		
Prudential Managed Defensive Pension Fund	1.00	0.875**
<p>The investment strategy of the fund is to purchase units in the Prudential Unit Trusts Ltd Prudential Managed Defensive Fund. That fund aims to achieve long term total return (the combination of income and growth of capital) with a bias towards income. The fund may invest either directly or via other collective investment schemes in assets including transferable securities, debt instruments, money market instruments, cash, near cash, deposits, equities, derivatives, and indirectly in property. The fund will invest no more than 35% of the portfolio in equities. Assets held will predominantly be denominated in sterling.</p>		

* These funds invest directly into the fund managers' own underlying fund or collective investment scheme.

** This non-series A fund is available to the Flexible Retirement Portfolio only.

*** Only available for all Individual & Group Series A & Premier Personal Pension Plans. Not available for Stakeholder pension (Individual or Group). Flexible Portfolio Plan, Trustee Investment Plan (where original investment was made on or after 1 January 2003) or Occupational Plans.

Category/Fund	Annual Management Charge % Series A funds applicable to: – Prudential Premier Plans – Ex-Scottish Amicable Series A & Premier Plans	Annual Management Charge % Non series A funds applicable to: – Ex-Scottish Amicable plans except Series A and Premier Plans – Flexible Retirement Portfolio
Lower to medium risk – Some of these funds invest in fixed interest securities, predominantly corporate bonds, with higher yielding corporate bonds placed towards the top end of this range as they carry higher default risk. The other funds in this category invest in a wide range of assets which help to provide risk diversification.		
Prudential With-Profits Fund (not available for PRIP and Stakeholder plans)	*	*
<p>This Fund aims to maximise growth over the medium to long term by investing in shares, property, fixed interest and other investments. The Fund currently invests in UK and international equities, property, fixed interest securities, index-linked securities and other specialist investments.</p> <p>The Funds aim to protect investors against some of the ups and downs of investment performance using "smoothing" mechanisms. There are currently two types of bonuses:</p>	<p>Regular bonus</p> <p>This is added during the term of your plan. When we decide the rates of regular bonus, one of the main things we consider is the return we expect our investments to earn in future. We hold back some of this return to enable us to pay final bonus. We can change the rate of future bonus any time without prior notice.</p> <p>Final bonus</p> <p>This is an additional bonus, which we expect to pay when you take money from your plan. If the investment return has been low over the lifetime of your Plan, a final bonus may not be paid. Final bonus may vary and is not guaranteed.</p> <p>If all, or any part of your Plan is invested in the With-Profits Fund, and the pension is transferred, switched to another fund or early retirement is taken, we may apply an adjustment called a Market Value Reduction (MVR). If an MVR applies you may not receive any final bonus, or the full value of the regular bonus. However, the amount you get back from your Plan will not be less than the value of the underlying investments relating to your share of the Fund. MVRs are designed to protect investors not taking their money out of the Fund.</p> <p>* The Annual Management Charge of this fund and charges to cover the cost of guarantees are already taken into account when we calculate the bonus rates for our With-Profits Fund. For further details of the charges for this fund, please refer to your Key Features document.</p>	

➤ Fund descriptions, fund charges and risk classification – continued

Category/Fund	Annual Management Charge % Series A funds applicable to: – Prudential Premier Plans – Ex-Scottish Amicable Series A & Premier Plans	Annual Management Charge % Non series A funds applicable to: – Ex-Scottish Amicable plans except Series A and Premier Plans – Flexible Retirement Portfolio
Medium risk – These funds are predominantly multi-asset funds with a higher weighting in equities. The Property Fund is also in this category		
Prudential M&G Managed Growth Pension Fund*	1.15	1.025**
The investment strategy of the fund is to purchase units in the M&G Managed Growth Fund. That fund aims to achieve long-term capital growth by investing predominantly in collective investment schemes in order to provide a well diversified exposure to global equities.		
Prudential Managed Distribution Pension Fund	1.00	0.875**
The investment strategy of the fund is to deliver capital growth and produce a regular income over the longer term by investing mainly in sterling denominated equities, bonds, property, interest bearing deposits and money market investments.		
Prudential Managed Pension Fund	1.00	0.875
The investment strategy of the fund is to provide steady medium to long-term total growth (the combination of income and growth of capital) by investing mainly in a broad spread of Prudential's investment-linked funds and collective investment schemes.		
Prudential Newton Balanced Pension Fund*	1.25	1.125**
The investment strategy of the fund is to purchase units in the Newton Balanced Fund. That fund aims to achieve a balance between capital growth and income predominantly from a portfolio of UK and international securities.		

* These funds invest directly into the fund managers' own underlying fund or collective investment scheme.

** These non-series A funds are available to the Flexible Retirement Portfolio only.

Category/Fund	Annual Management Charge % Series A funds applicable to: – Prudential Premier Plans – Ex-Scottish Amicable Series A & Premier Plans	Annual Management Charge % Non series A funds applicable to: – Ex-Scottish Amicable plans except Series A and Premier Plans – Flexible Retirement Portfolio
Medium risk – These funds are predominantly multi-asset funds with a higher weighting in equities. The Property Fund is also in this category		
Prudential Property Pension Fund	1.00	0.875
The investment strategy of the fund is to purchase units in the M&G Property Portfolio. That portfolio aims to maximise long-term total return (the combination of income and growth of capital) through investment mainly in commercial property. The portfolio invests in a diversified portfolio of commercial property mainly in the UK, seeking to add value through strategic asset allocation, stock selection and asset management. The portfolio may also invest in other property related assets, including collective investment schemes, securities, derivatives and debt instruments, as well as government debt, money market instruments and cash.		
Medium to higher risk – These funds offer a diverse geographical spread of equity investment. The funds within this category will have greater overseas exposure and underlying volatility than the “medium” sector		
Prudential International Pension Fund	1.00	0.875
The investment strategy of the fund is to provide long-term capital growth by investing mainly in a spread of equity markets throughout the world, mainly through Prudential's Unit Trusts. This includes the Prudential Trusts investing in the markets of the USA, Europe, the Asia-Pacific region and Japan.		
Prudential Invesco Perpetual Managed Pension Fund*	1.35	1.225**
The investment strategy of the fund is to achieve long-term capital growth by investing mainly in UK and overseas securities.		

* This is a Prudential fund managed on our behalf by the fund management group stated. It should not be confused with the same or similar named fund or unit trusts offered independently by the fund management group.

** These non-series A funds are available to the Flexible Retirement Portfolio only.

Prudential Old Mutual Japanese Select Pension Fund*	1.75**	n/a
The investment strategy of the fund is to purchase units in the Old Mutual Japanese Select Fund. That fund aims to achieve an above-average return through the active management of a diversified portfolio invested in the Japanese financial markets, whilst constraining the overall level of risk.		
Prudential Pacific Markets Pension Fund	1.00	0.875
The investment strategy of the fund is to provide total long-term growth (the combination of income and growth of capital) by investing in an actively managed portfolio of investments consisting wholly or mainly of companies which are mainly based in the Asia Pacific region (excluding Japan).		
Prudential Small Companies Pension Fund	1.00	0.875
The investment strategy of the fund is to provide above average long-term capital growth. The fund invests mainly in the shares of small growing companies, mainly in the UK.		

* This fund invests directly into the fund managers' own underlying fund or collective investment scheme.

** Only available for all Individual & Group Series A & Premier Personal Pension Plans. Not available for Stakeholder pension (Individual or Group). Flexible Portfolio Plan, Trustee Investment Plan (where original investment was made on or after 1 January 2003) or Occupational Plans.

For Premier Pensions the amounts quoted are the basic Annual Management Charges, shown as a percentage of daily unit price. The actual fund management charge depends on the contribution size and the level of commission selected.

For Premier Stakeholder Pensions and Premier Group Stakeholder there is a maximum charge of 1%. This means that some funds may be unavailable for these contracts (depending on contribution size and level of commission selected).

Where the funds invest in underlying a Unit Trust, Open Ended Investment Company or Qualified Investor Scheme then, additional expenses may be incurred. These are typically in the region of 0.00% to 0.25% (as at June 2011) each year, but can be more than this. It is our current practice to rebate these additional charges for Series A and Premier Plans, however we reserve the right to make these additional charges in the future, for Series A.

› Glossary of investment terms

This glossary is a high-level guide to some of the technical terminology that may appear in this Fund Guide. It is not intended to be a definitive reference document and you should contact your adviser for further assistance where necessary.

Basic Materials Sector – a category of stocks covering companies involved with the discovery, development and processing of raw materials. The basic materials sector includes the mining and refining of metals, chemical producers and forestry products.

“Blue Chip” Companies – these are large, reputable companies which are thought to be financially sound.

Bonds – see Fixed Interest Securities.

“Boutique Managed” Funds – investment funds that are specialised in some way either through the expertise needed to manage the portfolio or because it has an unusual theme or a collection of funds under one house. These “boutique” funds are typically offered by smaller, specialist firms as opposed to large investment management companies.

Broad Investment Grade – this is a term used to describe a listing of bonds and fixed income instruments on an index. It is used to measure the overall value of a collective group of bonds and represents the characteristics of these types of securities. It is a grading level that can be used by certain types of funds for determining assets that are suitable for investment into a fund.

Certificates of Deposit – these are a money market investments that are generally issued by banks against a security. A certificate of deposit usually pays interest (which can vary) and entitles the bearer to receive a set interest rate up until a set maturity date and can be issued in any currency or denomination.

Closed Ended Funds – this describes a collective investment scheme which has a limited number of shares (or units). The shares are then traded on an exchange or directly through the fund manager to create a secondary market subject to market forces.

Collective Investment Schemes – a way of pooling investment with others as part of a single investment fund. This allows investors to participate in a wider range of investments than would normally be feasible if investing individually and to share the costs and benefits of doing so. Collective Investment Schemes, OEICs, Unit Trusts, Mutual funds, usually either target geographic regions (like emerging market countries) or specific themes (like technology or property).

Convertible Bonds (can also be called Deferred Equity) – these are corporate bonds that are exchangeable for a set number of another form of investment (for example, common shares) at a pre-stated price. Convertible bonds typically pay a lower income than is normally available from common bonds.

Corporate Bonds – these are loans to companies where the purchaser of the corporate bond lends money to the company in return for regular interest payments and the promise that the initial sum will be repaid on a specified later date.

Default Risk – this is the possibility that the issuer of a bond will be unable to make payments when they are due.

Derivatives – these cover products such as futures and options which are generally an arrangement to buy or sell a standard quantity of a specified asset on a fixed future date at a price agreed today. Also considered to be a financial instrument whose value is dependent upon the value of an underlying asset.

Equities – these are also known as shares or stocks and represents a share of the ownership of a company. Shares give two potential benefits – the share prices increase as the value of the company increases and regular payments, known as dividends, may be made to shareholders based on how well the company is doing.

Eurobonds – a Eurobond is an international bond that is denominated in a currency not native to the country where it is issued. It can be categorized according to the currency in which it is issued. For example, a British company may issue a Eurobond in Germany, denominating it in U.S. dollars.

Exchange-Traded Fund – this is an investment vehicle the units of which are traded on a stock exchange. An exchange traded funds can hold a range of assets such as stocks, bonds or even commodities. Most track an index, such as the FTSE ALL share or the S&P 500.

Fixed Interest Securities – these are more commonly known as "bonds" and are loans issued by companies or by governments in order to raise money. Bonds issued by companies are called corporate bonds, those issued by the UK government are called gilts and those issued by the US government are called treasury bonds. In effect all bonds are IOUs that promise to pay a sum on a specified date and pay a fixed rate of interest along the way.

Floating Rate Notes – these are basically short-term loans to financial organisations, such as banks, under which the investor receives interest payments from that financial organisation. At the end of an agreed period the financial organisation has to repay the loan. The interest payment rates are linked to a specified "floating" rate typically the London Interbank Offered Rate (LIBOR). This means that interest rate payments may go up or down.

› Glossary of investment terms – continued

Forwards Contract (or Forwards) – these are agreements between two parties to buy or sell an asset at a fixed future date for a price determined at the time of dealing.

Government Bonds – these are loans to the government where the purchaser of the government bond lends money to the government in return for regular interest payments and the promise that the initial sum will be repaid on a specified later date.

Government Sovereign Bond – is a government debt issued in a foreign currency.

Hedging – a strategy employed in order to reduce or mitigate risk. Hedging involves making an offsetting transaction in one market in order to protect against possible losses in another.

Hedged Back to Sterling – this is a specific example of hedging where the trader is trying to protect an existing or anticipated position from an unwanted move in sterling exchange rates.

Index-Linked Securities – are similar to fixed interest securities but the payments out are normally increased by a price index e.g. for UK government index-linked securities, payments out are increased in line with the UK Retail Price Index.

Investment Grade – a credit rating given to a government or corporate bond that indicates that the agency giving the rating (e.g. Standard & Poors) believes that the issuer has a relatively low risk of default. Bonds with credit ratings of AAA, AA, A or BBB are considered investment grade. Low rated bonds with ratings of BB or below are often called Junk Bonds.

LIBOR (London Interbank Offered Rate) – this is the interest rate that London banks charge when lending money to one another over a short period of time. LIBOR is often used as a benchmark when setting other short term interest rates.

Money Market Investments – are defined as cash and near cash such as bank deposits, certificates of deposits, fixed interest securities or floating rate notes, with, where applicable, a maturity date of under a year.

OEIC – this is an Open Ended Investment Company, which is the British version of a European SICAV (Societe D'investissemnt a Capital variable) or Irish VCIC (Variable Capital Investment Company). Like all open collective Investment Schemes, an OEIC has no fixed amount of capital.

The total value of the OEIC is equally divided into shares which will vary in price and in the number issued. Each time that new money is invested, new shares or units are created to match the prevailing share price; each time shares are redeemed, the assets sold match the prevailing share price.

Options – legal agreements that give the holder the right (but not the obligation) to buy or sell the underlying asset at an expiration date, at a price determined at the time of dealing.

Permanent Interest Bearing Shares (usually referred to as PIBS) – these are fixed-interest securities issued by building societies. Building societies use them in the way public limited companies would use preference shares (see above). Although similar to bonds, PIBS typically exist as long as their issuer does. They typically offer better interest rates than bonds although unlike bonds have no fixed redemption date and so redemption value will be determined by market values at the time of sale.

PIBS are not covered by UK government compensation schemes. If the building society is in financial distress, amounts are paid to holders of PIBS only after depositors.

Preference Shares (also called Preferred Stock or Preferred Shares) – these are shares in a company which give their holders an entitlement to a fixed dividend payment and may or may not carry voting rights. These are a "higher ranking" stock than common stock and usually have specific rights attached to them.

Preference shares mean that the holder may get preferred treatment over common share holders – and carry a dividend that is paid out prior to dividends to common share holders. In the event of bankruptcy preferred share holders will be paid out from assets before common share holders and after debt holders.

Primary Industry – the industrial sector of an economy involved in the extraction and collection of natural resources, such as copper and timber, as well as by activities such as farming and fishing. A company in a primary industry can also be involved in turning natural resources into products. Primary industries tends to make up a larger portion of the economy of developing countries than they do for developed countries.

Qualified Investor Scheme (QIS) – A qualified investor scheme is essentially a mixed asset type of scheme where different types of permitted asset may be included as part of the scheme property, depending on the investment objectives and policy of that scheme and within any restrictions in the rules.

Regulated – this means the portfolio or fund has to conform to the regulations laid down by the financial authority it is trading in (i.e. the FSA in the UK), financial service providers and markets.

Secondary Industry – the industrial sector of an economy that produces finished, usable products. Unlike a primary industry, which collects and produces raw materials for manufacture, a secondary industry makes products that are more likely to be consumed by individuals. Examples of secondary industry divisions include automobile manufacturing, steel production and telecommunications.

Shares – see Equities.

Short-Term Government Bonds – for the purposes of determining assets which the Prudential Cash Funds can invest in these are defined as government bonds with a repayment period of twelve months or less.

Smaller Companies – companies quoted on a recognised exchange that have a market worth below that of blue chip companies. In the UK, smaller companies are typically defined as those with market capitalisations below the top 350 companies in the FTSE All Share Index.

Transferable Securities – this is a descriptor given to a type of financial security which is traded on capital markets. The term is probably most commonly known and used in association with UCITS in UK and Europe (examples would be UCITS/depositary receipts/some types of warrants).

Undertakings for Collective Investment in Transferable Securities (UCITS) – these are collective investments which can be sold across national borders within the EU having complied with regulations on investments and administration.

Unregulated – this means the portfolio or fund does not need to conform to regulations.

Warrants – a warrant is a security that entitles the holder to buy shares in the issuing company at a specified price and within a certain time frame.

Warrants are freely transferable and traded on major exchanges. Their value will go up or down as the price of the shares to which they relate goes up or down.
