Introduction to this guide

We know that choosing which fund may be best for you isn’t easy – there are many options and everyone’s different so there’s no ‘one way’ to invest.

So we offer a range of options to help you meet your investment goals.

We’ve produced this guide to help you and your financial adviser understand more about our funds. If there’s information or terminology included that you’d like to discuss, then please contact your financial adviser.

The funds in this guide are available to most investors in the following products:

- Flexible Income Drawdown Plan (FIDP)
- Flexible Lifetime Annuity (FLA)
Some important notes we’d like you to read:

- We’d like everyone to find it easy to deal with us. Please let us know if you need information about our plans and services in a different format.
- All our literature is available in audio, large print or braille versions. If you would like one of these please contact us on 0345 640 2000 and we’ll send these out to you.
- The types of assets a fund invests in will have a significant effect on its performance. Generally, the higher the potential returns, the higher the risk.
- A fund’s name isn’t indicative of the risk it may take.
- The information in this guide is correct as at 30 June 2019, unless another date is shown.
- This guide doesn’t take account of current market conditions or other short-term fund specific changes. Up to date information on each fund can be found at pru.co.uk/funds
- All views are Prudential’s.
- For important decisions it’s always good to talk to experts who can help you, that’s why we recommend that you discuss fund selection with your financial adviser.

Choosing a strategy

Some useful investment terms
Potential reward and risk

Asset class risk types

Funds can invest in different types of assets. Here we explain the risks of each.

There are many types of risks but generally, the higher the potential returns, the higher the risk.

Some funds can invest in more than one asset type to try to reduce the risk of losing money. So they’re not relying on the performance of an individual asset or assets of the same type. We call this diversification.

See pages 14 to 17 for how the following asset class risk types relate to individual funds.

Equity

Equities and “shares” are the same thing. When a fund buys a share, it’s investing in a company and, in exchange, receives a share of the ownership of that company. Shares give two potential investment benefits:

- share prices normally increase as the value of the company increases
- companies may pay dividends – regular payments to shareholders based on how well the company is doing.

Over the longer-term, equities can offer greater growth potential than many other asset types. But the value of equities can go down and up a lot. Funds investing in equities tend to carry a higher risk of capital loss than funds investing in fixed interest securities or money market investments (we’ll talk about these later in this section).

The financial results of other companies and general stock market and economic conditions can all affect a company’s share price, and as a result, the value of any fund investing in that company.

Where a fund invests in equities, we’ve rated the fund as having a risk type of “Equity”.

Learn more about asset classes and their risk

You should read this section to find out more about the different types of assets, or types of things funds invest in, and the risks that they have.

We’ve included this as later in the guide we’ll show which asset types and associated risks are applicable to different funds we offer.

Fixed Interest and Index-Linked Securities

Fixed interest securities, or “bonds”, are loans issued by companies or by governments in order to raise money. Bonds issued by companies are called Corporate Bonds, those issued by the UK government are often called Gilts or UK Government bonds and those issued by the US government are called Treasury Bonds. In effect all bonds are IOUs that promise to pay you a sum on a specified date and pay a fixed rate of interest along the way.

Index-linked securities are similar but the payments out are normally increased by a prices index. For example, for UK government index-linked securities, payments out go up in line with the UK Retail Prices Index.

On the whole, investing in government or corporate bonds is seen as lower-risk than investing in equities. The British Government has never failed to make interest or principal payments on gilts as they fall due. (Source: Debt Management Office, June 2019).

However, it’s possible for a government bond to default. And with corporate bonds there’s a risk that the company may not be able to repay its loan or that it may default on its interest payments.

You can reduce the risks related to investing in bonds if you invest through a bond fund. When a fund manager selects a range of bonds, you are less reliant on the performance of any one company or government. If the fund reinvests the bond income it generates, it can provide attractive levels of growth. But, there’s a risk you might not get back the amount you invest and the income you receive is neither fixed or guaranteed.

Corporate and government bonds are sensitive to interest rate trends. An increase in interest rates is likely to reduce their value, and the value of any fund investing in them.
Where a fund could be exposed to these types of risk, we’ve rated the fund as having a risk type of “Fixed Interest”.

Commercial Property

Commercial property investment generally means the fund is sharing in the returns from the ownership of some buildings (for example, offices and shopping centres). The value of the property may go up and tenants may pay rent to the owners of the building.

You can invest in property directly (eg owning physical property) or indirectly (eg owning shares in a property company as part of a diversified range of assets).

The return from investing in property is a combination of rental income and changes in the value of the property; which is generally a matter of a valuer’s opinion rather than fact. We think Property is lower risk than equities, but higher risk than bonds over the long-term.

However, commercial properties can be difficult to buy and sell quickly. Fund managers may have to delay withdrawal of money by customers from a property fund until they can sell some of the buildings the fund invests in. It may take a number of months to sell commercial property.

The actual value of a property is what someone is prepared to pay for it – an actual sale value. As sales are infrequent, interim valuations are based on a valuer’s opinion and can change from time to time. This can affect the value of a fund invested in commercial property, with the value possibly fluctuating significantly.

All of this means there are a number of risks for funds investing in property:

- Cash could remain uninvested as property assets can be difficult to buy, leading to lower returns than expected.
- The value of the fund may be reduced if there are a large number of withdrawals and it’s necessary for properties to be sold at reduced prices.
- There may be delays removing your money from the fund if property is proving difficult to sell.
- Property fund valuations may change periodically, upwards or downwards.
- Rental income isn’t guaranteed. Defaulted rent and unoccupied properties could reduce returns.
- If the size of the fund falls significantly, the fund may have to hold fewer properties, and this reduced diversification may lead to an increase in risk.
- In some circumstances we may suspend one or more of our Property funds to protect the interests of our investors. If this happens we’ll write to investors to let them know.

Where a fund could be exposed to these risks, we’ve rated the fund as having a risk type of “Property”.

Currency Risk and Overseas Investments

Overseas investments allow you to take advantage of the growth potential of markets outside of the UK. But currency changes can affect the value of overseas investments. Because the value of overseas investments is converted from local currency into pounds (Sterling), the Sterling value can fall if the local currency weakens against Sterling, independent of the performance of the asset itself.

Where a proportion of a fund is invested in non-Sterling assets, we’ve rated the fund as having a risk type of “Currency”.

Smaller Companies and Developing Markets

In comparison to larger companies, shares of smaller companies may be harder to trade and short-term performance may be more volatile. There may also be more chance the companies will become insolvent. Funds which invest in small companies can have volatile returns and a greater risk of capital loss.

Some investments are in markets which are less developed than the UK market. In such markets, the ability to trade, and the safe keeping of assets on behalf of the fund, and especially regulation may all be poorer than in well-developed markets.

This means increased risk for your investment.

Where a fund could have these types of risk, we’ve rated it as having a risk type of “Smaller Companies and Developing Markets”.
Financial Instruments

Fund managers can use several financial arrangements with the aim of improving fund performance. Some of the most common are:

**Derivatives**: These cover products such as futures and options which are generally an arrangement to buy or sell a standard quantity of a specified asset on a fixed future date at a price agreed today. This type of investment may carry a higher risk of capital loss than funds investing in other assets.

Derivatives usually rely on a counterparty – the person or company with which the fund manager has made the agreement about future deals. If the counterparty gets into financial difficulty, it may be difficult to obtain a price for valuations or for the investment manager to dispose of the asset – that creates risk to the value of the fund. There’s a risk of capital loss in the event of the counterparty becoming insolvent or suffering other financial difficulties. In such circumstances the derivative may have no value.

In such circumstances the derivative may have no value.

**Geared Assets**: Funds that are geared or borrow assets or which use short-selling are likely to be more volatile than other funds and there is a higher risk of capital loss.

Where a fund could be exposed to these types of risk, we’ve rated it as having a risk type of “Financial Instruments”.

Alternative Investments

These include non-traditional, complex, or specialist investments, such as hedge funds, private equity and complex derivative based strategies. Alternative investments can be more difficult to value and can take longer to buy or sell.

Where a fund could be exposed to these types of risk, we’ve rated it as having a risk type of “Alternative Investments”.

Other

We’ve rated a number of funds as having a risk type of “Other”.

In addition to the risks and characteristics of the individual asset types, specialist investments have other features that are unique to where they invest.

**Specialist funds**

Specialist funds invest in particular markets or geographical areas. Because they invest in a smaller range of asset types, they tend to be more risky than non-specialist funds, but can deliver greater returns.

**Ethical funds**

Ethical funds are restricted from investment in certain companies and asset types due to the criteria used to select investments for the fund. This may mean that the returns from the fund are more volatile than funds which don’t have these restrictions.

**Small number of holdings**

The fund may have investment concentrated in relatively few individual assets. So, returns from the fund can be significantly influenced by the performance of a small number of individual holdings and may be more volatile than funds with a wider spread of underlying assets.
**Low risk assets**

Some funds keep a proportion of your money in cash deposits and other money market investments. Over the long-term, money market investments usually offer the lowest risk of all asset types but also the lowest potential returns. Some funds hold money market investments because they’re aiming for security more than substantial growth. Others hold just enough in cash deposits to make sure money is available for customer withdrawals. Over the long term, money market investments can be a low risk asset type but may also produce low returns compared to other asset types.

A money market investment is at risk if any of the banks, building societies or other financial institutions with whom the fund’s money is deposited becomes insolvent or suffers other financial difficulties. If this happens, the money deposited with that institution may not be returned in full. Some money market investments will be affected if interest rates rise, leading to a drop in value of any fund holding them.

**Protected or guaranteed funds**

Some funds may offer some form of protection from downside risks for which there will be a charge and which will normally have an impact on long-term returns. The protection may be provided through the use of derivative contracts and this may give rise to counterparty risk and liquidity problems. The provision of the guarantees may result in a significant proportion of the fund being invested in cash and other lower risk investments.

Where a fund could be exposed to these types of risk, we’ve rated it as having a risk type of “Other”.

---

**Further information**

If you’re looking for more information on these risks then please speak to your financial adviser.
Investing is about balancing the risk you’re comfortable with alongside the potential rewards that you want to achieve. Your attitude to investment risk is personal to you and may change in the future.

The table opposite can help illustrate this concept. It’s not exhaustive, but covers a wide range of funds and investments and shows the general principle that, as the level for potential higher returns goes up so does the level of risk. On pages 14 to 17 you can see how these potential reward and risk indicator numbers relate to our funds.

Some key things to think about:

- The value of your investment can go down as well as up so you might get back less than you put in.
- We’ve developed these risk rating categories to help provide an indication of the potential level of reward and risk that’s attributable to a fund based on the type of assets which may be held within the fund.
- These risk rating categories shouldn’t be considered generic to the fund management industry as other companies might use different descriptions.
- We regularly review these risk rating categories and so they might change in the future.
- We may amend a risk rating as a result of a material change in our view of the level of risk for the fund. For example due to a significant change to the assets held by the fund or in the way the fund is managed. If we do this, we’ll provide information on the new risk rating.
- We strongly recommend that before making any fund choice you ensure you understand the appropriate risk ratings. You’ll find helpful information in this fund guide, along with further information, at pru.co.uk/funds.

For details of material fund changes please visit pru.co.uk/fundchanges

Information is normally shown for one year.

You should also consider discussing your decision with your financial adviser. It’s important to also note that your adviser may make their own assessment of the risk rating of funds when considering your needs and objectives, and this may differ from Prudential’s own internal assessment.

The information included in this guide is correct as at 30 June 2019, unless another date is shown.
Potential Reward and Risk Indicator

Types of Fund

These are mostly based on sector classifications by the Association of British Insurers (ABI). The description used may match an individual ABI sector name or be a Prudential suggested description for a grouping of similar sectors. The only exception to this is “With-Profits” which isn’t classified by the ABI. Where a fund is classified by the ABI then we’ll use the sector it’s in as a starting point to think about its appropriate position in the scale above. But please note that each fund is considered individually and membership of an ABI sector doesn’t automatically imply a particular potential reward and risk indicator number.

Further information

If you’re looking for more information, including the latest version of this fund guide and details of changes to our funds, then please visit pru.co.uk/funds. You’ll also find an explanation of each of the ABI sector classifications on pru.co.uk/abi.
Fund information
Explanations we think you should read

Learn about what can impact on your fund value and about charges and costs
This section can help you understand a bit more about the factors that can impact on funds and what we mean by fund charges and further costs.

Unit Pricing Basis for Unit-Linked Funds
When we determine the basis to be used for calculating the unit price, it’s important to think about how much money is either going into or is being taken out of either Prudential’s fund or the underlying investment. The unit price is then used to determine the value of individual policyholders’ investments in the fund.

If more money is being paid into the fund than is being taken out, then the fund will need to purchase assets. If this is the case then the amount that’s needed to buy assets for the fund (i.e. the purchase price) will be more relevant than the amount obtained for selling the assets (i.e. the sale price) in determining the unit price of the fund.

If more money is being taken out of the fund than is being paid in then the fund will need to sell assets. If this is the case, the sale price of the underlying assets will be more relevant when calculating the unit price.

Sales prices are generally lower than purchase prices. The size of the difference depends on the cost of either purchasing or selling the assets the fund invests in. These costs tend to be largest for funds investing in property, smaller companies and developing markets so will have the largest impact on the change in price.

If there’s a switch from a purchase price to a sales price then the unit price could reduce. If there’s a switch from a sales price to a purchase price then the unit price could go up. In both cases the movement in price can be frequent, significant and will happen straight away.

You can find details of how we manage our Unit-Linked funds at pru.co.uk/ppfm/ul

You’ll also find there a shortened customer friendly version, our “Customer Guide”, which explains briefly:

- how the Prudential unit-linked funds work.
- our current approach to managing them.
- the standards and practices we use to manage the funds.

Principally, this Customer Guide will explain:

- the nature and extent of the decisions we take to manage the funds, and
- how we treat customers and shareholders fairly.
The Fund Value

The value of your investment can go down as well as up so you might get back less than you put in.

For investments in the With-Profits fund, the value of the plan depends on how much profit the fund makes and how we decide to distribute it. If you’re unsure how the With-Profits Fund works, please speak to a financial adviser.

How Funds Invest

Some of the Prudential funds listed in this guide may gain all or part of their investment exposure by investing in collective investment schemes such as Unit Trusts, Open Ended Investment Companies (OEICs), derivatives or other investment vehicles, where the aims and underlying assets are consistent with the objectives of the fund. These Prudential funds may hold an element of cash due to the short delay between new investments being received by the Prudential fund and being placed in the underlying investment(s), and this may have an impact on the performance of the Prudential fund when compared to the underlying investment(s).

Fund Charges and Further Costs

Annual Management Charge

We take an Annual Management Charge (AMC) for looking after your investment, from each of the funds you invest in. Any further costs shown are expenses which are borne by the fund. Together they add up to the Yearly Total (%). These are shown on pages 14 to 17.

This AMC also includes a 0.25% charge for further commission – this is ongoing commission linked to the value of the plan.

If you agree a different commission rate above or below 0.25% this will be debited or credited through cancelling or adding units respectively.

In general the AMC is taken by the deduction each day of 1/365th of the applicable Annual Management Charge, from the relevant investment-linked fund.

This differs slightly for With-Profits.

For the With-Profits Fund, we deduct a charge through the bonus mechanism. This is currently expected to be 0.85% a year, assuming future investment returns in the With-Profits Fund are 5% a year. Charges on With-Profits business depend on the performance of the With-Profits Fund and, in particular, the investment returns achieved and expenses incurred. Over time, if investment returns are higher, the charges would be expected to be higher, and if investment returns are lower, the charges would be expected to be lower.

There’s an additional charge to pay for the guarantees the With-Profits Fund supports. The annual charge, further costs, and charges to cover the cost of these guarantees, are already taken into account when we calculate the bonus rates for our With-Profits Fund. To find out more about the charges for this fund, please refer to the Key Features Document and other plan documentation, including your annual statement, or speak to your adviser.
Further costs

In addition to our annual charges, there may be further costs incurred. Where these are applicable, they’re paid for by the fund and will impact on the overall performance. Some examples of what these further costs might include are shown below. These aren’t listed in order of importance, they won’t necessarily apply to all funds, and this isn’t an exhaustive list.

<table>
<thead>
<tr>
<th>Name</th>
<th>What this means</th>
<th>Where applicable, are they included in the further costs figures we show in this fund guide and/or illustration?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Miscellaneous fund administration fees and costs</td>
<td>There can be a number of different administration fees and costs associated with funds. These can include, for example, audit fees, custody fees, infrastructure costs, registrar fees, regulatory fees, stock lending fees, and trustee fees.</td>
<td>Yes, for a number of these funds, but not all (see below*).</td>
</tr>
<tr>
<td>Performance fees</td>
<td>In some funds the fund managers are paid a fee depending on how they perform.</td>
<td>No, but if they’re applicable they will impact on the performance of a fund.</td>
</tr>
<tr>
<td>Property expenses</td>
<td>For funds that invest in property, either directly (i.e. the fund owning physical property) or indirectly (i.e. owning units in a property fund or shares in a property company) there are costs incurred for managing these properties. These can include costs for development, maintenance, oversight and renovation of the properties held, collecting rents, and managing tenants, as well as running costs that cannot be passed onto tenants.</td>
<td>No, for unit-linked funds**, unless they’re for property investments that are managed by M&amp;G, which are disclosed. Yes, for the With-Profits fund.</td>
</tr>
<tr>
<td>Transaction costs</td>
<td>When a fund manager trades the investments in a fund (for example, makes a decision to sell one holding and buy another) there are associated costs, for example taxes.</td>
<td>No, but if they’re applicable they will impact on the performance of a fund.</td>
</tr>
</tbody>
</table>

* Currently these are rebated back by Prudential for the Prudential M&G Dividend Fund, Prudential M&G Global High Yield Bond Fund, Prudential M&G Managed Growth Fund and the Prudential Risk Managed Passive 1 Fund. For these funds they won’t impact on the fund performance, and aren’t disclosed. We reserve the right to not rebate them in the future.

** Currently these are rebated back by Prudential to the fund, so they won’t impact the fund performance, and aren’t disclosed. We reserve the right to not rebate them in the future.

Further costs might be incurred by a Prudential fund or, where it’s applicable, any fund our fund invests in (see the ‘Investment strategy’ for information on where a fund might invest).

Fund charges and further costs may vary in future and they may be higher than they are now. We’ll write to you if an AMC goes up for a fund you are invested in, unless the change in the AMC we quote is part of the expected function of that fund (for example our With-Profits fund – see your Key Features document for more information). As it’s normal for further costs to vary over time we won’t contact you when they change. If fund charges and further costs exceed the return earned, the fund will go down in value.

The further costs listed in this guide are indicative, based on the current levels of costs, and are correct as at 30 June 2019.
This brochure is based on our understanding, as at 30 June 2019, of the current taxation, legislation and HM Revenue and Customs practice, all of which are liable to change without notice. The impact of taxation (and any tax reliefs) depends on individual circumstances.

Your funds are invested in a Prudential contract. Although the investment return will reflect the performance of your chosen fund manager(s), you don’t have any contract with them; your contract remains with Prudential. This doesn’t apply to funds held as part of a self invested personal pension.

For Flexible Lifetime Annuity, the investment strategy can continue undisturbed up to the policy anniversary following your 89th birthday.

The value of your fund may be eroded, especially if investment returns are poor and a high level of income is taken; this could result in a lower income in the future.

The investment returns may be less than those shown in the illustrations. Annuity rates may be at a worse level in the future. When maximum withdrawals are taken, high levels of income may not be sustainable.

The Prudential Assurance Company Limited (PACL) and other UK authorised and regulated firms in the Prudential Group are covered by the Financial Services Compensation Scheme. You may be able to make a claim if Prudential is unable to meet its financial obligations. However, it’s important to know that any compensation will depend on your eligibility, the type of financial product or service involved, the funds selected (if applicable) and the circumstances of the claim.

Find out more about Prudential and the FSCS at: pru.co.uk/about_us/fscs or you can call the FSCS on 0800 678 1100.

Questions you may have

How many funds can I hold?
If you’re following a self-managed investment strategy you can invest in a maximum of 19 funds from the range available subject to the minimum investment amount. Please refer to your technical guide we issued to you or the general funds appendix issued with your members booklet.

What is the minimum switch amount?
The minimum amount that you can switch between funds is £2,500.

What is the maximum I can invest in any fund?
There’s no maximum.

Further information

If the taxation treatment of the funds changes, we reserve the right to change the arrangements for the investment of the underlying assets of the fund.

If you have any questions about this product, your fund choice or the fund charges and further costs applicable then we recommend you speak to your financial adviser.

For any fund, there may be a delay in buying, selling or switching of units. These delays will only apply in exceptional circumstances. We wouldn’t expect delays to be longer than six months for units that invest in property or land and one month for units that invest in other funds. However, we can’t guarantee that we’ll never delay longer than these timescales. If these delays apply to you, we’ll let you know.

The Prudential Assurance Company Limited (PACL) and other UK authorised and regulated firms in the Prudential Group are covered by the Financial Services Compensation Scheme. You may be able to make a claim if Prudential is unable to meet its financial obligations. However, it’s important to know that any compensation will depend on your eligibility, the type of financial product or service involved, the funds selected (if applicable) and the circumstances of the claim.

Find out more about Prudential and the FSCS at: pru.co.uk/about_us/fscs or you can call the FSCS on 0800 678 1100.

### The annual charge, further costs, and charges to cover the cost of the guarantees, are already taken into account when we calculate the bonus rates for our With-Profits Fund. Please refer to your Key Features Document and other plan documentation, including your annual statement, for information on charges.

### Further information

If you’re looking for more information on these funds, for example fact sheets, then visit [pru.co.uk/funds](http://pru.co.uk/funds)

You’ll also find an explanation of each of the ABI sector classifications on [pru.co.uk/abi](http://pru.co.uk/abi)
The following funds have been selected and made available to you by Prudential. The choice of funds covers a range of different assets and types of funds which could be right for you at different times. Some of the funds are managed by Prudential whilst others are managed by external fund managers. The following funds are all Prudential Pension Funds. For the externally managed funds the Prudential fund will invest in the fund manager’s own fund or collective investment scheme, as explained in the following investment strategies, unless otherwise stated.

### Prudential Artemis Global Growth
The investment strategy of the fund is to purchase units in the Artemis Global Growth Fund. That fund aims to achieve long-term capital growth from a diversified portfolio investing in any economic sector in any part of the world. The Manager actively manages the portfolio in order to achieve the objective and will not be restricted in respect of choice of investments either by company size or industry, or in terms of the geographical split of the portfolio.

### Prudential Artemis Income
The investment strategy of the fund is to purchase units in the Artemis Income Fund. That fund aims to achieve a rising income combined with capital growth from a portfolio primarily made up of investments in the United Kingdom. The Manager actively manages the portfolio in order to achieve the objective with exposure to ordinary shares, preference shares, convertibles and fixed interest securities.

### Prudential Artemis Strategic Bond
The investment strategy of the fund is to purchase units in the Artemis Strategic Bond Fund. That fund aims to achieve a combination of income and capital growth by investing predominantly in fixed income markets but may selectively invest in other markets. Equal emphasis is given to the security of capital and income although from time to time one may take prominence over the other in accordance with the strategy being pursued.

### Prudential Artemis UK Select
The investment strategy of the fund is to purchase units in the Artemis UK Select Fund. That fund aims to achieve long-term capital growth. The emphasis of the fund will be investment in companies listed, quoted and/or traded in the UK and in companies which are headquartered or have a significant part of their activities in the UK which are quoted on a regulated market outside the UK.

### Prudential AXA Framlington UK Select Opportunities
The investment strategy of the fund is to purchase units in the AXA Framlington UK Select Opportunities Fund. That fund aims to achieve capital growth by investing in companies, primarily of UK origin where the manager believes above average returns can be realised.

### Prudential BlackRock Gold & General
The investment strategy of the fund is to purchase units in the BlackRock Gold & General Fund. That fund seeks to achieve long-term capital growth primarily through an actively managed portfolio of gold mining, commodity and precious-metal related shares. The fund may also invest in other transferable securities and units in collective investment schemes. Derivatives may also be used for investment purposes and for the purposes of efficient portfolio management. It tends to be volatile and is particularly suitable for diversification in a larger portfolio.
Prudential BlackRock UK
The investment strategy of the fund is to purchase units in the BlackRock UK Fund. That fund aims to achieve long-term capital growth for investors by investing primarily in the shares of larger companies incorporated or listed in the UK. The fund may also invest in collective investment schemes.

Prudential BlackRock UK Special Situations
The investment strategy of the fund is to purchase units in the BlackRock UK Special Situations Fund. That fund aims to achieve long-term capital growth for investors by investing primarily in the shares of companies incorporated or listed in the UK and will normally have an emphasis on small or medium sized companies. The fund may also invest in collective investment schemes.

Prudential BNY Mellon Global Income
The investment strategy of the fund is to purchase units in the BNY Mellon Global Income Fund. That fund aims to generate distributions over an annual period together with long-term capital growth from investing predominantly in global securities. The Sub-Fund may also invest in collective investment schemes (including but not limited to another Sub-Fund or Sub-Funds of the Company. Derivatives may be used for efficient portfolio management only.

Prudential Cash
The investment strategy of the fund is to provide a return consistent with investing in interest bearing deposits and/or short-term UK government bonds.

Prudential Global Emerging Markets Portfolio
This Portfolio aims to achieve long-term total return (the combination of income and growth of capital). It is a managed portfolio investing in Collective Investment Schemes in order to provide equity exposure to emerging stock markets worldwide or companies with significant activities in emerging markets.

Prudential Invesco Distribution
The investment strategy of the fund is to purchase units in the Invesco Distribution Fund (UK). That fund aims to achieve a combination of income and capital growth over the medium to longer term.

Prudential Invesco Global Bond
The investment strategy of the fund is to purchase units in the Invesco Global Bond Fund (UK). That fund aims to achieve a combination of income and capital growth over the medium to long term. The fund seeks to achieve its objective by investing primarily in debt securities and currencies globally. Debt securities include government bonds, as well as securities issued by supranational bodies, local authorities, national public bodies and corporate issuers. The fund may also invest in high yield, unrated, convertible, sub-investment grade debt securities, cash, cash equivalents, money market instruments, collective investment schemes and other transferable securities. Financial derivative instruments can be used for investment purposes and for efficient portfolio management. They may include derivatives on currencies, interest rates and credit, and can be used to achieve both long and short positions. Up to (but no more than) 10% in value of the fund may be invested in each of the following: collective investment schemes and deposits.

Prudential Invesco Global Targeted Returns
The investment strategy of the fund is to buy units in the Invesco Global Targeted Returns Fund (UK). That fund aims to achieve a positive total return in all market conditions over a rolling 3 year period. The Fund targets a gross return of 5% per annum above UK 3 month LIBOR (or an equivalent reference rate) and aims to achieve this with less than half the volatility of global equities, over the same rolling 3 year period. There is no guarantee that the Fund will achieve a positive return or its target and an investor may not get back the full amount invested.

The fund seeks to achieve its objective by using a range of investment strategies and techniques to invest actively in a broad selection of asset classes across all economic sectors worldwide. These asset classes will include...
equities, equity related securities, debt securities (including those issued by corporate bodies, governments and/or supranational institutions), warrants, collective investment schemes (including but not limited to exchange traded funds), cash, near cash, money market instruments and any other eligible instrument.

**Prudential Invesco High Income**
The investment strategy of the fund is to purchase units in the Invesco High Income Fund (UK). That fund aims to achieve a high level of income, together with capital growth by investing primarily in companies listed in the UK, with the balance invested internationally.

**Prudential Invesco Income**
The investment strategy of the fund is to purchase units in the Invesco Income Fund (UK). That fund aims to achieve a reasonable level of income together with capital growth by investing primarily in shares of companies listed in the UK, with the balance invested internationally.

**Prudential Invesco Managed Growth**
The investment strategy of the fund is to purchase units in the Invesco Managed Growth Fund (UK). That fund aims to achieve capital growth from a portfolio primarily of Qualifying Funds. In pursuing this objective, the fund managers may include investments that they consider appropriate which include transferable securities, money market instruments, warrants, collective investment schemes, deposits and other permitted investments and transactions.

**Prudential Invesco Monthly Income Plus**
The investment strategy of the fund is to purchase units in the Invesco Monthly Income Plus Fund (UK). That fund aims to achieve a high level of income together with capital growth over the medium to long term.

**Prudential Janus Henderson Cautious Managed**
The investment strategy of the fund is to purchase units in the Janus Henderson Cautious Managed Fund. That fund aims to provide a combination of income and long-term capital growth through investment in a diversified portfolio of equities, bonds and other related investments. The investment in equities will be limited to a maximum of 60% of the value of the fund’s portfolio.

**Prudential Janus Henderson China Opportunities**
The investment strategy of the fund is to purchase units in the Janus Henderson China Opportunities Fund. That fund aims to provide a combination of income and long-term capital growth through investment in a diversified portfolio of equities, bonds and other related investments. The fund invests predominantly in companies registered in Hong Kong or China, or that carry out the majority of their business activities in these markets.

**Prudential Janus Henderson European Selected Opportunities**
The investment strategy of the fund is to purchase units in the Janus Henderson European Selected Opportunities Fund. That fund aims to achieve a long-term return, in excess of the long-term return that is typically achieved from investments in European equity markets, by investing in companies registered in Europe or that carry out the majority of their business activities in these markets.

**Prudential JP Morgan Europe Dynamic (ex UK)**
The investment strategy of the fund is to purchase units in the JP Morgan Europe Dynamic (ex-UK) Fund. That fund aims to maximise long-term capital growth by investing primarily in continental European equities.

**Prudential JP Morgan Natural Resources**
The investment strategy of the fund is to purchase units in the JP Morgan Natural Resources Fund. That fund aims to provide capital growth over the long term by investing primarily in the shares of companies throughout the world engaged in the production and marketing of commodities.
Prudential M&G Corporate Bond
The investment strategy of the fund is to purchase units in the M&G Corporate Bond Fund. That fund aims to provide income and capital growth. At least 70% of the fund is invested in sterling-denominated corporate debt instruments. The fund’s exposure to corporate debt may be gained through the use of derivatives. Derivatives may also be used for efficient portfolio management. Any currency exposures within the fund may be managed by currency hedges into sterling. The fund may also invest in collective investment schemes, other transferable securities and other debt instruments (including corporate debt and government and public securities denominated in any currency), cash, near cash, other money market securities, warrants and other derivative instruments.

Prudential M&G Dividend
The investment strategy of the fund is to purchase units in the M&G Dividend Fund. That fund invests mainly in a range of UK equities with the aim of achieving a steadily increasing income stream. The fund will target a yield higher than that of the FTSE All-Share Index. Subject to this, the aim will be to maximise total return (the combination of income and growth of capital).

Prudential M&G European Select
The investment strategy of the fund is to purchase units in the M&G European Select Fund. That fund aims to provide a higher total return (the combination of capital growth and income), net of the Ongoing Charge Figure, than that of the FTSE World Europe ex UK Index over any five-year period.

At least 80% of the Fund is invested directly in equity securities and equity-related securities of companies across any sectors and market capitalisations that are incorporated, domiciled, listed or do most of their business in Europe (excluding the United Kingdom). The Fund usually holds a concentrated portfolio of fewer than 50 companies. The Fund may also invest in other transferable securities directly and via collective investment schemes (including funds managed by M&G). The Fund may also hold cash for liquidity purposes. Derivatives may be used for efficient portfolio management and hedging.

Prudential M&G Gilt & Fixed Interest Income
The investment strategy of the fund is to purchase units in the M&G Gilt & Fixed Interest Income Fund. The fund aims to provide income and capital growth. At least 70% of the fund is invested in short, medium or long-dated gilts according to the fund manager’s view at any given moment of the likely course of interest rates and trend of the gilt market. The fund’s exposure to gilts may be gained through the use of derivatives. Derivatives may also be used for efficient portfolio management. The fund may also invest in collective investment schemes, other transferable securities, other debt instruments, cash, near cash, other money market instruments, warrants and other derivative instruments.

Prudential M&G Global High Yield Bond
The investment strategy of the fund is to purchase units in the M&G Global High Yield Bond Fund. That fund aims to provide income and capital growth. At least 80% of the fund is invested in higher yielding corporate debt instruments which may be denominated in sterling, European currencies and other major global currencies, should the investment managers deem them to be appropriate investments. The fund’s exposure to higher yielding corporate debt instruments may be gained through the use of derivatives and any currency exposures within the fund may be managed by currency hedges into sterling. Derivatives may also be used for efficient portfolio management. The fund may also invest in collective investment schemes, government and public securities and other transferable securities, cash, near cash, other money market instruments, warrants and other derivative instruments. More than 80% of the fund will be in sterling or hedged back to sterling.

Prudential M&G Global Select (also known as M&G International)
The investment strategy of the fund is to purchase units in the M&G Global Select Fund. The fund aims to provide a total return (the combination of capital growth and income).
At least 80% of the fund is invested in companies globally across a wide range of geographies, sectors and market capitalisations. The fund has a concentrated portfolio and usually holds fewer than 40 stocks. The fund is based on an investment process that uses fundamental analysis to identify competitively advantaged companies with sustainable business models.

Sustainability considerations play an important role in determining the investment universe and assessing business models. Companies that are assessed to be in breach of the United Nations Global Compact principles on human rights, labour, environment and anti-corruption are excluded from the investment universe. Industries such as tobacco and controversial weapons are also excluded. The fund may also invest in other transferable securities, directly or via collective investment schemes, and may hold cash for liquidity purposes. Collective investment schemes may include funds managed by M&G. Derivatives may be used for efficient portfolio management.

**Prudential M&G Japan**

The investment strategy of the fund is to purchase units in the M&G Japan Fund. That fund aims to provide a higher total return (the combination of capital growth and income), net of the Ongoing Charge Figure, than that of the MSCI Japan Index over any five-year period.

At least 80% of the Fund is invested directly in equity securities and equity-related securities of companies across any sectors and market capitalisations that are incorporated, domiciled, or do most of their business in Japan. The Fund usually holds a concentrated portfolio of fewer than 50 companies. The Fund may also invest other transferable securities directly and via collective investment schemes (including funds managed by M&G). The Fund may also hold cash and near cash for liquidity purposes. Derivatives may be used for efficient portfolio management and hedging.

**Prudential M&G Managed Growth**

The investment strategy of the fund is to purchase units in the M&G Managed Growth Fund. The fund aims to deliver a higher total return (the combination of capital growth and income), net of the Ongoing Charge Figure, than that of a composite index comprising 85% global equities and 15% global bonds, over any five-year period. The fund is a multi-asset fund that invests at least 70% of its assets in other collective investment schemes in order to gain exposure to assets from anywhere in the world, including equities, fixed income, convertibles, cash, or near cash. The fund may also invest directly in these assets. In aggregate, the fund will invest at least 70% of its assets in equities, either directly or via collective investment schemes. Derivatives may be used for investment purposes, efficient portfolio management and hedging.

**Prudential M&G Property Portfolio**

The investment strategy of the fund is to purchase units in the M&G Property Portfolio. That fund aims to carry on Property Investment Business and to manage cash raised from investors for investment in the Property Investment Business. In so doing, the fund aims to maximise long term total return (the combination of income and growth of capital) through investment mainly in commercial property.

**Prudential M&G Recovery**

The investment strategy of the fund is to purchase units in the M&G Recovery Fund. That fund aims to provide a higher total return (the combination of capital growth and income), net of the Ongoing Charge Figure, than that of the FTSE All-Share Index over any five-year period.

At least 80% of the Fund is invested directly in equity securities and equity-related securities of companies across any sectors and market capitalisations that are incorporated, domiciled, listed or do most of their business in the United Kingdom. The Fund may also invest in other transferable securities directly and via collective investment schemes (including funds managed by M&G). The Fund may also hold cash for liquidity purposes. Derivatives may be used for efficient portfolio management and hedging.
Prudential M&G Short Dated Corporate Bond

The investment strategy of the fund is to purchase units in the M&G Short Dated Corporate Bond Fund. The fund aims to provide a total return (the combination of capital growth and income). At least 80% of the fund is invested in investment grade corporate bonds (including variable rate securities and fixed income securities). The fund invests in securities which on aggregate produce a low portfolio duration, in order to limit the effect of interest rate movements on the Fund's capital value. These securities may be issued anywhere in the world. The fund aims to hedge non-GBP assets to GBP. Derivatives can be used to meet the Fund’s investment objective and for efficient portfolio management. The fund may also invest in other debt securities (including government and public securities denominated in any currency), collective investment schemes, other transferable securities, cash, near cash, other money market securities, warrants, and other derivative instruments.

Prudential M&G Smaller Companies

The investment strategy of the fund is to purchase units in M&G Smaller Companies Fund. That fund aims to deliver a higher total return (the combination of capital growth and income) than the Numis Smaller Companies Index (excluding Investment Companies), net of the Ongoing Charge Figure, over any five year period.

At least 80% of the fund is invested in the UK smaller companies. These are UK listed companies which, at the initial time of purchases, are:

- in the bottom 10% (by market capitalisation) of the FTSE All-Share Index, or
- in the Numis Smaller Companies Index (excluding Investment Companies), or
- listed on the Alternative Investment Market.

The fund may also invest in collective investment schemes and other transferable securities. Cash and near cash may be held for ancillary purposes and derivatives, including warrants, may be used for efficient portfolio management and hedging purposes.

Prudential Managed

The investment strategy of the fund is to provide medium to long-term growth (the combination of income and growth of capital) by investing mainly in a broad spread of Prudential’s investment-linked funds and collective investment schemes. The fund will typically have exposure to a range of asset types, including UK and overseas equities, fixed interest and commercial property.

Prudential North American

The investment strategy of the fund is to purchase units in the LF Prudential North American Qualified Investor Scheme Fund. That fund aims to achieve long-term capital growth by investing in North American securities.

Prudential Pacific Markets

The investment strategy of the fund is to purchase units in the LF Prudential Pacific Markets Trust. That trusts aims to produce capital growth through investment of at least 80% of the property of the Scheme in eastern markets excluding Japan. Investment will primarily be in major markets such as Australia, Hong Kong, Singapore and Thailand, but to a lesser extent this Scheme may invest in emerging markets such as The Philippines, Taiwan and South Korea.

Prudential Risk Managed Passive 1

The investment strategy of the fund is to buy units in the LF Prudential Risk Managed Passive 1 Fund. That fund aims to achieve long-term (in excess of 5 years) total return (the combination of income and growth of capital) by investing in a mix of assets from around the world and aims to limit volatility over rolling 5 year periods to 9%. There is no guarantee that the volatility target will be met and at any time the actual volatility may be higher or lower than the long term target.
Prudential Risk Managed Passive 3
The investment strategy of the fund is to buy units in the LF Prudential Risk Managed Passive 3 Fund. That fund aims to achieve long-term (in excess of 5 years) total return (the combination of income and growth of capital) by investing in a mix of assets from around the world and aims to limit volatility over rolling 5 year periods to 12%. There is no guarantee that the volatility target will be met and at any time the actual volatility may be higher or lower than the long term target.

Prudential Schroders Income
The investment strategy of the fund is to purchase units in the Schroder Income Fund. That fund aims to provide a growing income by investing primarily in UK equities.

Prudential Schroder UK Smaller Companies
The investment strategy of the fund is to purchase units in the Schroder UK Smaller Companies Fund. That fund aims to provide capital growth by investing in equity and equity related securities of small-sized UK companies.

The fund invests at least 80% of its assets in equity and equity related securities of small-sized UK companies. These are companies that are incorporated, headquartered or have their principal business activities in the UK and, at the time of purchase, are similar in size to those comprising the bottom 10% by market capitalisation of the UK equities market.

The small cap universe is an extensive, diverse and constantly changing area of the UK market. Smaller companies offer investors exposure to some niche growth areas that, often, cannot be accessed through large companies. They also tend to grow more rapidly than larger firms.

The fund may also invest in other equity and equity related securities, collective investment schemes, fixed income securities, warrants and money market instruments, and hold cash.

The fund may use derivatives with the aim of reducing risk or managing the fund more efficiently.

Prudential Stewart Investors Asia Pacific Leaders
The investment strategy of the fund is to purchase units in the Stewart Investors Asia Pacific Leaders Fund. That fund aims to achieve long-term capital growth by investing primarily in large and mid-capitalisation equities issued by companies that are incorporated or listed, or which conduct the majority of their economic activity, in the Asia Pacific region (excluding Japan, including Australasia). Particular consideration is given to investment in companies that are positioned to benefit from, and contribute to, the sustainable development of the countries in which they operate.

Prudential With-Profits*
The fund aims to maximise growth over the medium to long term by investing in shares, property, fixed interest and other investments. The fund currently invests in UK and international equities, property, fixed interest securities, index-linked securities and other specialist investments.

* This fund aims to protect investors against some of the extreme highs and lows of short-term investment performance using a “smoothing” mechanism. Please refer to “Your With-Profits Plan – A guide to how we manage the Fund” (document reference WPGB0027) for more information.

Further information
If you’re looking for more information on these funds then visit pru.co.uk/funds
Choosing a strategy

When thinking about choosing an option, you must remember that the higher the exposure to the stock market, the greater the potential investment returns over the longer term. Equally, if the stock market falls, the greater the risk to the value of investment and so your retirement income will fall.

There are three Lifetime investment strategies to choose from:

- Cautious
- Standard
- Adventurous

Each strategy offers a different balance of potential investment return and risk, which is set by the mix of investment funds held. These are our own definitions, and apply to the strategies rather than to the funds within each strategy. The Lifetime Investment Strategy funds (which are described in detail on previous pages) are:

- The Prudential With-Profits Fund
- The M&G Managed Growth Pension Fund
- The M&G Corporate Bond Pension Fund (Series 2)

The investment risk of each strategy generally reduces as you get older. We do this by automatically re-balancing the mix between the different investment funds within the chosen strategy every year. Your choice of strategy also determines your investment mix when you reach the policy anniversary following your 89th birthday.

The Lifetime Investment Strategies have been designed to run potentially right through to the policy anniversary following your 89th birthday. If you’re investing only in the Flexible Income Drawdown Plan (FIDP), investment past the age of 75 isn’t available so it may not be appropriate for you to pursue a Lifetime Investment Strategy. You’ll need to discuss this with your adviser.

Details of the three strategies are set out here:

Cautious

With this strategy, units are held in a mix of the M&G Managed Growth Fund (which is a ‘fund of funds’ i.e. a fund that invests in other funds rather than directly in assets), the Prudential With-Profits Fund and the M&G Corporate Bond Fund. The Managed Growth Fund is gradually replaced by a greater holding in the Corporate Bond Fund. When you reach the policy anniversary following your 85th birthday, the holding in each of the funds will gradually be replaced by an element of Fixed Guaranteed Income. When you reach the policy anniversary following your 89th birthday you’ll receive a fixed amount of income which is guaranteed for life and won’t reduce (we call this a 100% Fixed Guaranteed income).

Note: While the cautious lifetime strategy is lower risk when compared with the other investments available from FRIA, it’s higher risk when compared to the option of purchasing a guaranteed pension annuity for example.
Standard

With this strategy, units are held in the M&G Managed Growth Fund (which is a ‘fund of funds’ i.e. a fund that invests in other funds, rather than directly in assets), the Prudential With-Profits Fund and the M&G Corporate Bond Fund. The units in the Managed Growth Fund are gradually replaced by a greater holding in the With-Profits Fund and the Corporate Bond Fund. When you reach the policy anniversary following your 85th birthday some of your funds will be gradually exchanged for Fixed Guaranteed Income. When you reach the policy anniversary following your 89th birthday your remaining funds will be converted into a Fixed Guaranteed Income (which is a fixed amount of income which is guaranteed for life and won’t reduce) and With-Profits Income (in the case of remaining With-Profits Fund units) which will provide you with a regular income for the rest of your life. It's linked to the performance of our With-Profits Fund, so your income has the potential to go up. Your income can also fall, although we’ll never pay you less than a certain level which we call your Secure Level.

Adventurous

This strategy has the highest stock market content, provided by the M&G Managed Growth Fund (which is a ‘fund of funds’ i.e. a fund that invests in other funds, rather than directly in assets). The holding in this fund is gradually switched into the Prudential With-Profits Fund. When you reach the policy anniversary following your 89th birthday, the whole fund is converted into a With-Profits Income which will provide you with a regular income for the rest of your life. It’s linked to the performance of our With-Profits Fund, so your income has the potential to go up. Your income can also fall, although we’ll never pay you less than a certain level which we call your Secure Level.

Note: If you decide to switch from one Lifetime Investment Strategy to another (after the policy anniversary following your 85th birthday) you should be aware that the new strategy will apply regardless of previous switch transactions. Any previous conversions to a Fixed Guaranteed Income are permanent and can’t be reversed.

The risk profile of funds can be judged in different ways and may change. Our Strategy options, from time-to-time, may not match to our Prudential risk ratings, in terms of the movement from higher to lower risk, as our Prudential risk ratings may change.
Some useful investment terms

Learn about some tricky investment related words

You should read this section to find out what some of the more technical terms in this guide mean. We’ve included this information in case there’s wording that you’re unsure of.

This is a high-level guide to some useful investment terms. It’s not meant to cover every term you may come across. Please speak to your financial adviser if you need help or want to know more about terms used around investments.

“Blue Chip” Companies
Companies which are large, and considered to be reputable and financially sound.

Bonds (and Fixed Interest Securities)
All bonds are really just IOUs that promise to pay an amount of money on a specified date and pay a fixed rate of interest along the way. Companies and governments can issue bonds, when they want to raise money. Bonds issued by companies are called corporate bonds. Bonds issued by the UK government are called gilts and those issued by the US government are called treasury bonds.

Collective Investment Schemes
A way of pooling investment with others within a single investment fund. Once you’ve joined the scheme, you can have access to a wider range of investments than if you were investing individually. You’ll also share the costs and benefits. Collective Investment Schemes, OEICs, Unit Trusts, Mutual funds, usually either target investments in geographic regions (like emerging market countries) or specific themes (like technology or property).

Corporate Bonds
Loans to companies where the buyer of the corporate bond lends money in return for regular interest payments and the promise that the initial sum will be repaid on a specified later date.

Derivatives
These refer to products such as futures and options which are generally an arrangement between different parties to buy or sell a standard quantity of a specified asset on a fixed future date at a price agreed today.

Equities
Equities are also known as shares or stocks. They are a share of the ownership of a company. Shares have two potential benefits. Firstly, the share price goes up as the value of the company goes up. Also, regular payments, called dividends, may be made to the owner of the share. These are based on how well the company is doing.

Financial Times Stock Exchange (FTSE)
London Stock Exchange Group plc and its group undertakings (collectively, the “LSE Group”). © LSE Group 2019. FTSE Russell is a trading name of certain of the LSE Group companies. e.g., “FTSE®” “Russell®”, “FTSE Russell®”, “MTS®”, “FTSE4Good®”, “ICB®”, “Mergent®, The Yield Book®,” are a trade mark(s) of the relevant LSE Group companies and are used by any other LSE Group company under license. “TMX®” is a trade mark of TSX, Inc. and used by the LSE Group under license. All rights in the FTSE Russell indexes or data vest in the relevant LSE Group company which owns the index or the data. Neither LSE Group nor its licensors accept any liability for any errors or omissions in the indexes or data and no party may rely on any indexes or data contained in this communication. No further distribution of data from the LSE Group is permitted without the relevant LSE Group company’s express written consent. The LSE Group does not promote, sponsor or endorse the content of this communication.

Floating Rate Notes
Short-term loans to financial companies, such as banks. The investor receives interest payments, and at the end of an agreed period the company has to repay the loan. The interest payment rates are linked to a specified “floating” rate, usually the London Interbank Offered Rate (LIBOR). This means that interest rate payments may go up or down.

Government Bonds
Loans to the government where the buyer of the government bond lends money to the government. In return, they get regular interest payments and the promise that the initial sum will be repaid on a specified later date.
Hedging
A way of trying to reduce or limit risk. Hedging involves making a deal in one market in order to try to protect against possible losses in another. Often used by Hedge Funds.

Index-Linked Securities
Are similar to fixed interest securities but the payments to the investor are normally increased in line with a measure of inflation.

Investment Grade
An agency (e.g. Standard and Poors) can give a rating to a corporate or government bond. The rating indicates the agency believes that the bond issuer has a relatively low risk of not paying what it owes the buyer of the bond. Bonds with credit ratings of AAA, AA, A or BBB are considered investment grade. Low rated bonds with ratings of BB or below are often called Junk Bonds.

LIBOR (London Interbank Offered Rate)
The interest rate that London banks charge when they lend money to each other over a short period of time. It's often used as a benchmark by companies like banks when setting other short term interest rates.

Money Market Investments
These are cash and investments similar to cash such as bank deposits, certificates of deposits, fixed interest securities or floating rate notes. They usually have a life of less than a year.

OEIC
An open collective investment scheme. Like all such schemes, an OEIC has no fixed amount of capital. The total value of the OEIC is equally divided into shares which will vary in price and in the number issued. When you invest new money, new shares or units are created to match the share price. When you take money out (redeem your shares), the assets are sold at the share price.

Preference Shares (also called Preferred Stock or Preferred Shares)
Shares in a company which give their holders a right to a fixed dividend payment. Some carry voting rights.

If you hold preference shares, you may get preferential treatment over common shareholders. You’ll get a dividend before them and, in the event of bankruptcy, you’ll be paid from company assets before common shareholders (but after debt holders).

Shares
See Equities.

Smaller Companies
Companies that you can find on a recognised exchange that have lower value than blue chip companies. In the UK, smaller companies are usually defined as those with market values below the top 350 companies in the FTSE All Share Index.

Undertakings for Collective Investment in Transferable Securities (UCITS)
Collective investments, such as OEICs and SICAVs, which can be sold across national borders within the EU.

Units/Unit Linked
Unit linked funds are divided into units and the investors hold a number of units representing the money they have invested. The price of units changes daily to reflect the value of the assets held in the fund and so the investor’s fund value at any point depends on the price of the units.

Further information
